Multi-layer tubing having at least one intermediate layer formed from a polyamide alloy

REISSUE: July 10, 2003 - Reissue Application filed, Ex. Gp.: 3752; Re. S.N. 10/617,014 • (O.G. September 5, 2006)

APPL-NO: 023593 (09)

FILED-DATE: February 13, 1998

GRANTED-DATE: July 10, 2001

ASSIGNEE-PRE-ISSUE: February 13, 1998 - ASSIGNMENT OF ASSIGNORS INTEREST (SEE DOCUMENT FOR DETAILS)., ITT MANUFACTURING ENTERPRISES, INC. 1105 NORTH MARKET STREETWILMINGTON, DELAWARE, 19801, Reel and Frame Number: 009028/0286

ASSIGNEE-AT-ISSUE: ITT Manufacturing Enterprises, Inc., Wilmington, Delaware, United States (US), United States company or corporation (02)

ASSIGNEE-AFTER-ISSUE: May 1, 2006 - SECURITY INTEREST (SEE DOCUMENT FOR DETAILS)., DEUTSCHE BANK TRUST COMPANY AMERICAS, AS COLLATERAL AGENT 280 PARK AVENUE NEW YORK NEW YORK 10017, Reel and Frame Number: 017564/0165 July 7, 2006 - STOCK AND ASSET PURCHASE AGREEMENT, COOPER-STANDARD AUTOMOTIVE INC. 39550 ORCHARD HILL PLACE NOVI MICHIGAN 48375, Reel and Frame Number: 017892/0524

Publication Stage :

(B1) U.S. Patent (no pre-grant pub.) after Jan. 2, 2001 Abstract:

A multi-layer tube for use in a motor vehicle system to transport fluids containing hydrocarbons such as would be found in a fuel line, a vapor return line or a vapor recovery tube having a first layer radially disposed innermost made up of an extrudable melt-processible thermoplastic material capable of withstanding prolonged exposure to automotive fuel and various fuel additives, and second layer made up of an extrudable, melt-processible non-polyester, non-alcoholic thermoplastic material capable of sufficiently permanent laminar connection with the first layer so as to prevent delamination between the first and second layers during a desired lifetime of the tube. The thermoplastic material of the second layer is made up of at least one constituent which is chemically dissimilar from the thermoplastic material employed in the first layer such as a melt-processible compound having at least two isocyanate groups in combination with a compound ' which is chemically similar to the thermoplastic material of the first layer such as a thermoplastic elastomer, or a polyamide. The tubing of the present invention may, optionally, include additional layers interposed between the respective layers or may include additional layers which overlie the exterior surface of the second layer.
